As a human-centered designer, I blend research, strategy, execution, and leadership to craft impactful design experiences. I specialize in both web and mobile design, collaborating with businesses committed to improving people's lives. My goal is to drive innovation and influence the world by merging business objectives with user requirements through exceptional design solutions.

## Experience

### Lead Product Designer | Offiise.

Nov 2023 - Present, Ghana

- Conducted user research to deeply understand the needs and pain points of shipping agents and truck drivers, informing the design process.
- Orchestrated a comprehensive redesign of the Offiise mobile app, focusing on optimizing workflows, improving navigation, and enhancing overall usability.
- Collaborated closely with developers, product managers, and other stakeholders to ensure seamless integration of design elements into the app.

### UI Desgner | TradeGrow

July 2023 -Present, Ghana

- Spearheaded user research initiatives to understand investor behavior, resulting in UI enhancements that improved user engagement and satisfaction.
- Developed wireframes, prototypes, and mockups to communicate design ideas, incorporating feedback to iterate and refine the final products.
- Participated in design workshops and conferences to enhance skills and contribute to a culture of continuous improvement.

## UI/UX Designer | FalconHive

October 2023, Ghana

- Conducted thorough user research to understand the diverse needs of educators, administrators, and students, ensuring a deep understanding of the educational landscape.

- Applied a user-centered design approach to create products that seamlessly integrated into the daily workflows of educators while providing a positive experience for students.

- Received recognition for delivering impactful designs that contributed to the efficiency of educational institutions and improved the overall user experience for both educators and students.

## Lead Product Designer | Tonitel

April 2023, Ghana

- I played a pivotal role in shaping the mobile app experience for our remote health services. My work focused on creating a user-centric and intuitive platform that facilitated seamless interactions between healthcare providers and patients.

- Created interactive prototypes and wireframes to visualize design concepts and gather feedback from both internal teams and potential users.

**MY PROJECT**

## Salon Booking App I SalonPlus

- As the Product Designer for SalonPlus, a personal project aimed at revolutionizing the salon booking experience, I undertook a multifaceted role in conceptualizing, designing, and refining a mobile app that seamlessly connects users with salon services.

- Initiated the project by conducting market research to understand user needs and preferences in the salon industry.

- Applied a user-centric design approach, ensuring that the app addressed pain points and provided value to both customers and salon professionals
